

## Abstract Details

**Title:** A Study on Efficient & Secure Data Mining Technique for Detecting Financial Frauds

**Author:** Vikas Chahar

**Abstract:** Data might be one of the most valuable assets of any corporation—but only if it knows how to reveal valuable knowledge hidden in raw data. Data mining allows to extract diamonds of knowledge from the historical data, and predict outcomes of future situations. It helps optimise business decisions, increase the value of each customer and communication, and improve customer satisfaction.

**Keywords:** Data Mining Technique, Financial Frauds.
